Note:

Get 2 seatconsoles from the scrap-yard and weld or screw 2 solid metal strips on to them, drill holes, screw your new seats on to them. Now you can slide the seats like you used to. Installing seats is one of those difficult jobs, so experience in D-I-Y is a must. Furthermore, some cars are a bit easier, whilst others are a pain! If you're not Mr. D-I-Y himself, why not have a look at the made-to-measure Baseframes by Sparco, right here in this catalogue!

Mentioned prices are advice prices, with VAT, without freight costs.
